INSTRUCTIONS FOR FILING FORM R-C, OIL AND GAS IMPORT/EXPORT SUMMARY

Purpose Of Report

This form shows the volume and source of oil or gas imported from other states or countries and the volume and destination of oil or gas exported to other states or countries. This form may be used with the R2, R3, or R5T TAS reports.

Instructions For Form R-C

1. The original report should be filed on goldenrod color paper.
2. The company name, month, year, reporting code and selection of ORIGINAL or CORRECTION at the top of the form should be identical to the information on Part 1. If this page accompanies an R3 report, enter the refinery name and location in the space labeled FACILITY. This line should be left blank when this page accompanies the R2 or R5T report.
3. Check the appropriate box to indicate which report this page accompanies.
4. This form may be used to report imports and exports of either oil or gas, but not both at the same time. The entire report must report either oil or gas only.
5. Indicate whether oil or gas is being reported by selecting the appropriate group code. The same type must be selected for both imports and exports.
6. Enter the total volume imported from or exported to each individual state or country on the line for that location. Circle the line number for the location being reported to insure that the correct line code will be entered.
7. Compute the total imports and exports from other states and enter the amount in the space provided. Total the imports and exports from other countries and enter this amount in the space provided. Add the two sub-totals to obtain total imports or exports. This amount should be entered in the space provided, and also at Group Code 135 or 235 on Part 1. On R5T group code 235 or 285.

Correction Procedure

File the report giving the pertinent information with respect to the line number and state or country name and enter only the lines that contain data, to be corrected. If a line is to be added, enter the line within the proper group code in line number sequence. This line number should be the next number after the last line number entered within that group code on the original report. Lines may be deleted by entering the line as it appears on the original report with a volume of zero. **IMPORTANT:** The total acquisition volume must agree with the total disposition volume on said report. Mark the correction box with an "X" on said report. If corrections are filed on this page only, and does not necessitate a correction, then you may certify by signature and date on this form only.
